PRAKHAR SHUKLA

Computer Science graduate with hands-on experience in full-stack development, AWS infrastructure, and LLM evaluation.

+918979513406 therockstarop9956@gmail.com LinkedIn GitHub Website Lucknow, India

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in **full-stack development** and a strong foundational understanding of **computer science**. Practical exposure includes evaluating over **500+** prompts and LLM responses during an internship, showcasing skills in **Artificial Intelligence** and **multi-person projects**. Ready to leverage skills in a dynamic Software Engineer role.

WORK EXPERIENCES

LLM Post Training | Internship — Mar 2026 - May 2026
Ethara AI — *Remote • Gurugram, Haryana*

- Evaluated **500+** prompts and LLM responses to assess factual accuracy, relevance, consistency, and user interaction quality, contributing to the development of **AI systems**.
- Analyzed AI-generated outputs across multiple test scenarios, identifying edge cases and response inconsistencies, showcasing experience in **multi-person projects**.
- Developed and tested prompting strategies and feedback loops across **500+** prompt evaluations to assess improvements in factuality and relevance, utilizing principles of **Artificial Intelligence**.

Technologies / Skills Used : *AIML, Prompt Engineering, Large Language Models (LLMs), LLM Evaluation, Response Quality Analysis, Artificial Intelligence*

PROJECTS

Full-Stack Task Management System | Github △ Vercel — 2025

- Developed a full-stack task management application using React.js, Node.js, and REST APIs to manage **3 core entities: tasks, projects, and users**.
- Implemented authentication and role-based access control (RBAC) with **2 user roles: Admin and Member**.
- Containerized the application with Docker and deployed it on AWS using a CI/CD pipeline to streamline deployment and updates.

Technologies / Tools Used : *React.js, Node.js, Express.js, REST APIs, SQL/NoSQL, Docker, AWS*

AI Agent Workflow Automation Platform | Github △ Vercel — 2026

- Built a visual AI workflow builder supporting **6+ node types** for designing and managing multi-step agent workflows.
- Integrated LangChain and LLM APIs to orchestrate AI task execution across **multiple workflow steps**.
- Implemented Redis and MongoDB for workflow state management, execution tracking, and coordination across **6+ workflow node types**.

Technologies / Tools Used : *LangChain, LLM Integration, Multi-Agent AI Workflows, Redis, MongoDB, Artificial Intelligence*

POSCO E-Commerce Food Delivery Platform | Github △ Vercel — 2026

- Developed a responsive food-delivery interface featuring **3 core modules**: menu browsing, cart management, and mobile-friendly layouts.
- Designed MongoDB schemas and implemented **4 CRUD operations** (Create, Read, Update, Delete) to manage application data.
- Built reusable React components and optimized the interface for **3 screen sizes**: mobile, tablet, and desktop.

Technologies / Tools Used : *MongoDB, React, Node.js, Express, Tailwind CSS*

Multi-Server Web Hosting Infrastructure | Github — 2023

- Configured a **multi-server AWS environment** using EC2, Auto Scaling Groups, and Linux servers for web application hosting.
- Configured VPC subnets, security groups, and IAM roles to manage network access and AWS resource permissions.
- Used **Amazon RDS** for relational data and **S3** with **CloudFront** for static content delivery.

Technologies / Tools Used : *EC2, Auto Scaling Groups, Linux, Amazon RDS, S3, CloudFront*

SKILLS

Databases :	MongoDB, MySQL, PostgreSQL, Redis, DynamoDB
Frameworks & Libraries :	Node.js, Express.js, React.js, FastAPI
Programming Languages :	Java, Python, JavaScript, TypeScript, C++
Soft Skills :	Communication, Leadership, Teamwork, Problem Solving
Tools & Platforms :	Docker, Kubernetes, Jenkins, Git, Postman, Linux, GitHub

EDUCATIONS

GLA University | Mathura — Aug 2022 - Jun 2026
B.Tech in Computer Science & Engineering — *CGPA : 7.65*

- Pursued a Bachelor of Technology (B.Tech) in **Computer Science** and Engineering with a specialization in the Internet of Things (IoT). Developed a foundation in data structures, algorithms, database management, operating systems, and software development. Built hands-on projects in **full-stack web development**, **cloud computing**, and **AI/ML**, strengthening problem-solving and programming skills.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials, AWS - View Certificate
- AWS Foundations of Prompt Engineering, AWS - View Certificate
- Cisco – Switching, Routing and Wireless Essentials, Cisco - View Certificate
- Cisco – Introduction to Networks, Cisco - View Certificate

LEADERSHIP & EXTRACURRICULARS

General Secretary — 2023–2025
Computer Science & Engineering Club

- Served as General Secretary of the CSED Club for **3 academic years (2023–2026)**, coordinating technical events, workshops, and peer mentoring activities.
- Collaborated with student teams to organize technical initiatives and promote student participation in coding and technology activities.

RELEVANT COURSEWORK

- Completed coursework in Data Science and Analytics.
- Studied Artificial Intelligence and Machine Learning.
- Learned about IIoT Communication and Standard Interface.
- Studied Introduction to Internet of Things.
- Explored Machine Learning for IoT applications.
- Studied Smart Industrial Connectivity and industrial IoT systems.
